

I thought that America was founded on Freedom of choice. This is yet another case of lobbyists having a stranglehold over the very people that pay your salary.

I purchased satellite radio to get away from the typical commercial hum-drum that FM radio has become... Is the FCC and Federal government going to screw this up as well?

I ***STRONGLY*** oppose the HR bill 4026. How dare you tell me what I can listen to when I am paying for the service?

When is the government going to go back to listening to the people? When there is a rich enough lobby to present our side?
